👤 <https://shopecoomerce.netlify.app/>

MERN Stack Developer with real-world experience in building fast, scalable web apps using React, Node.js, and MongoDB.

Professional Experience

GenesisX50

Founder & Project Manager

- Founded and led GenesisX50, a crypto project that reached a \$7M market cap. Oversaw product architecture, team coordination, marketing, investor relations, and CoinMarketCap listing. Gained hands-on experience in agile leadership, decentralized systems, and SaaS.

Projects

E-commerce App – MERN Stack Storefront

shopecoomerce.netlify.app

- GitHub: Frontend & Backend
- Full-stack MERN e-commerce app with JWT auth, protected routes, product filtering, cart, order history, and responsive UI.

Sam-Movie – Movie Listing App

sam-movie.netlify.app

- React Movie App that fetches data from a public API with search, filters, pagination, loading states, and theme toggle.

Task-Trek – Task Management App

task-trek.netlify.app

- GitHub: Repository
- Task Manager App with drag-and-drop UI in React. Supports task CRUD with localStorage and a clean, user-friendly interface.

Education

Netanya Academic College

B.A. (Not Completed) – Information Systems

Management, Netanya Academic College.

Covered databases, system design, and

software dev. Transitioned to practical

MERN stack development.
